TRUSTEES.

Rev. GEORGE E. PIERCE, S. T. D. President.
Rev. JOHN SEWARD, *Aurora.*
Rev. CALEB PITKIN, *Hudson.*
Hon. HENRY BROWN, *Brownhelm,*
Rev. HARVEY COE, *Hudson.*
Rev. BENJAMIN FENN, *Gustavus.*
HARMON KINGSBURY, Esq., *Cleveland.*
HEMAN OVIATT, Esq., *Richfield.*
TIMOTHY ROCKWELL, Esq., *Painesville.*
Rev. SAMUEL C. AIKIN, *Cleveland.*
Hon. ELISHA N. SILL, *Cuyahoga Falls.*
HARVEY BALDWIN, Esq., *Hudson.*
Rev. EVERTON JUDSON, *Milan.*

OFFICERS OF THE BOARD.

Rev. GEORGE E. PIERCE, S. T. D., President.
Rev. JOHN SEWARD, Vice President.
TIMOTHY HUDSON, Esq., Treas. and Rec. Sec.
Hon. ELISHA N. SILL, Auditor.
PHILO WRIGHT, A. M., Librarian.

PRUDENTIAL COMMITTEE.

Rev. GEORGE E. PIERCE, S. T. D.
Rev. CALEB PITKIN.
Rev. JOHN SEWARD.
HARVEY BALDWIN, Esq.
Hon. ELISHA N. SILL.

EXAMINING COMMITTEE.

Rev. WILLIAM C. CLARK, *Cuyahoga Falls.*
Rev. BENSON C. BALDWIN, *Medina.*
HENRY N. BISSELL, *Milan.*
Rev. HARVEY COE, *Hudson.*
JOHN A. FOOT, Esq., *Cleveland.*
Rev. MASON GROSVENOR, *Hudson.*
Rev. NATHAN B. PURINTON, *Warren.*
Hon. ELISHA N. SILL, *Cuyahoga Falls.*
Rev. DEXTER WITTER, *Burton.*
Rev. AARON K. WRIGHT, *Wadsworth.*

FACULTY.

REV. GEORGE E. PIERCE, S. T. D.,
PRESIDENT.

REV. LAURENS P. HICKOK, A. M.,
Tappan Professor of Christian Theology.

REV. ELIJAH P. BARROWS, A. M.,
Professor of Sacred Literature.

REV. CLEMENT LONG, A. M.,
Professor of Intellectual and Moral Philosophy.

REV. HENRY N. DAY, A. M.,
Oviatt Professor of Sacred Rhetoric.

ELIAS LOOMIS, A. M.,
Professor of Mathematics and Natural Philosophy.

SAMUEL ST. JOHN, A. M.,
Professor of Chemistry, Mineralogy, and Geology.

NATHAN P. SEYMOUR, A. M.,
Professor of the Latin and Greek Languages and Literature.

JOSEPH FEW SMITH, A. B.,
Tutor.

PHILO WRIGHT, A. M.,
Principal of the Preparatory Department.

RUFUS PATCH, A. B.,
Assistant Teacher.

THEOLOGICAL STUDENTS.

THEOLOGICAL DEPARTMENT.

COURSE OF STUDY.

I. Sacred Literature—including the Hebrew Language, the Greek of the Septuagint and New Testament, Archæology, Principles of Interpretation, and Exegetical Study of the Scriptures.

II. Ecclesiastical History—including Sacred Chronology, Geography, Church Polity, and Missions.

III. Systematic Theology—including Mental Philosophy, Moral Philosophy, Natural Theology, Revealed Theology, and Positive Institutions.

IV. Rhetoric—including Composition and Delivery of Sermons, and Pastoral Theology.

Instruction in this department will be given by the President in Ecclesiastical History, and in the other branches by the appropriate Professors. A full and thorough course of theological instruction is provided, arranged to occupy three years, and designed to prepare young men for the greatest efficiency in the ministry.

Every person admitted to the course, must evince hopeful piety, be in communion with some church of Christ, and have graduated at some regular College, or otherwise have made substantially equivalent attainments in learning.

The proper time for entering the department is at the commencement of the first Collegiate term of the year, and the vacations will be the same as in the College course.

Rooms are fitted and furnished for the use of theological students, and no charge is made in this department for tuition or rooms.

COLLEGIATE DEPARMENT.

COURSE OF STUDY.

I. Latin and Greek Languages.

FRESHMAN YEAR.

1st Term, { Xenophon's Cyropædia, begun.
Livy, begun.

2nd Term, { Cyropædia, continued through six books.
Livy, continued through five books.

3rd Term, { Homer's Iliad, begun.
Horace, begun.

SOPHOMORE YEAR.

1st Term, { Iliad, continued through eight books.
Xenophon's Memorabilia, from two to three books.

2nd Term, { Horace, finished.
Cicero de Contemnenda Morte.
Plato's Republic, begun.

3rd Term, { Plato's Republic, finished.
Cicero de Oratore.
Plato's Phædo.

JUNIOR YEAR.

1st Term, { Tacitus; Agricola, Manners of the Germans, and two books of the History.
Oration of Demosthenes on the Crown.

2nd Term, { Quintilian, begun.
Woolsey's Greek Tragedies, begun.

3rd Term, { Quintilian, continued through four books.
Greek Tragedies, continued.
Cicero de Officiis.

In addition to the above text books, the student is expected to have as books of reference, Eschenburg's Manual of Classical literature; Butler's Ancient Atlas; Anthon's Classical Dictionary, and Buttman's Greek Gramuar translated by Robinson.

II. Mathematics and Natural Philosophy.

FRESHMAN YEAR.

1st Term, Davies' Geometry, five books.

2nd Term, { Geometry, continued through nine books.
Davies' Algebra, commenced.

3rd Term, Algebra continued to chapter fifth.

SOPHOMORE YEAR.

1st Term, { Algebra finished. / Application of Algebra to Geometry. / Plane Trigonometry.

2nd Term, { Spherical Trigonometry. / Mensuration of Surfaces and Solids. / Davies' Surveying.

3rd Term, Davies' Analytical Geometry.

JUNIOR YEAR.

1st Term, Davies' Differential and Integral Calculus.

2nd Term, { Olmsted's Natural Philosophy, third edition, / Mechanics.

3rd Term, { Olmsted's Natural Philosophy, Hydrostatics and Optics, with Experimental Lectures.

SENIOR YEAR.

1st Term, { Olmsted's Natural Philosophy, Pneumatics, Acoustics, Electricity, Magnetism, Galvanism, and Electro-Magnetism, with experimental Lectures.

2nd Term, Olmsted's Astronomy, with Mason's Supplement.

Instruction in this department is given solely by recitations and such incidental explanations as the progress of the pupil seems to require, until the third term of the Junior year. A course of lectures is then commenced, the design of which is to furnish experimental illustrations, and to supply deficiencies of the text books. It embraces the general principles of Mechanics, Hydrostatics and Pneumatics; the theory of Musical Vibrations; a full exhibition of the phenomena of polarized and unpolarized Light; the principles of Electricity, Magnetism, Galvanism, and Electro-Magnetism; and the most important facts and principles in Meteorology. The whole is embraced in not less than fifty lectures. Apparatus recently purchased in London and Paris, at an expense of over four thousand dollars, furnishes ample means of illustration. Theological students may have access to these lectures free of expense. The Astronomical Observatory recently erected, contains an Equatorial Telescope, made by Simms of London, with a focal length of five and a half feet, and an aperture of four inches. The right ascension and declination circles are each two inches in diameter, reading by verniers, the former to single seconds of time, and the latter to ten seconds of arc. It has a large assortment of eye pieces and a position micrometer. The Observatory contains also a Transit Circle by the same maker. It has a

telescope of thirty inches focus, and an aperture of nearly three inches. The circle is eighteen inches in diameter, graduated on platina to five minutes, having three fixed microscopes each reading to single seconds. The clock was made by Molineux of London, has a mercurial pendulum, and is found to be very little affected by changes of temperature. A part of the regular instruction of the senior class in astronomy consists in an explanation of the construction and use of these instruments, and an exhibition through the telescope of the most prominent objects in the heavens.

III. Chemistry, Mineralogy, and Geology.

Instruction is given in this department, by recitations from text books accompanied by theoretical and experimental lectures. A very large addition has been made to the Chemical apparatus, which will greatly facilitate the illustrations of that science. A collection of fifteen hundred choice Mineralogical and Geological specimens, selected with very great care, has been obtained, and is so arranged as to exhibit the important relations of all the species. A large proportion of the specimens are from European and other foreign localities. The collection also embraces a suite of fossils obtained from Berlin, illustrating a very interesting geological epoch.

SEMIOR YEAR.

1st Term, Turner's Chemistry, with experimental Lectures.

2nd Term,
- Turner's Chemistry, reviewed.
- Crystalography.
- Shepard's Mineralogy.
- Conchology.

3rd Term,
- Bakewell's Geology.
- Botany.
- Smellie's Philosophy of Natural History.
- Zoology.

IV. Intellectual, Moral, and Political Philosophy.

SOPHOMORE YEAR.

1st Term,
- Abercrombie on the Intellectual Powers.
- History.

2nd Term, Plato's Republic.

3rd Term, Plato's Republic.

JUNIOR YEAR.

3rd Term, Cicero de Officiis.

SENIOR YEAR.

1st Term, { Stewart's Elements of Intellectual Philosophy, with Lectures. / Cousin's Psychology.

2nd Term, { Whately's Logic. / Wayland's Moral Science, with Lectures. / Principles of Political Science.

3rd Term, { Story on the Constitution. / Wayland's Political Economy.

There are infelicities attending the exclusive use, in this Department, either of text-book instruction, or of instruction by lecture and the investigation of subjects under the direction of the Professor. The former method does not necessarily call into exercise the reflective powers of the student. It permits him to learn by rote the sentiments of an author, without forming any opinions for himself. The other method supposes more maturity of mind than is usual in students at this stage of their progress. It also leaves it too much to their option whether they will make a diligent and faithful improvement of all their time. The mode of instruction which is practised in the Senior class, unites the advantages of both these methods. The student is required to recite from text-books, as in other departments, and to know, not only what he thinks, but what his author thinks. He is expected to bear as rigid an examination upon the principles laid down in books, as he is in the department of Mathematics. At the same time, his own views are elicited upon the topics as they present themselves in the course of recitation. He is also required frequently to write upon themes proposed by the instructor, and his compositions are made the subject of remark and criticism. The most important principles are further illustrated by lectures from the Professor.

V. Rhetoric.

FRESHMAN YEAR.

Science and Art of Elocution.

1st and 2nd Terms, Translation from Latin authors.
3rd Term, English composition.

SOPHOMORE YEAR.

English composition, through the year.
3rd Term, Cicero de Oratore.

JUNIOR YEAR.

English composition, through the year.
1st Term, Oration of Demosthenes on the Crown.
2nd Term, Quintilian's Institutes, four books.

SENIOR YEAR.

Original Declamation.
3rd Term, Whately's Rhetoric.

The members of the three lower classes exhibit specimens of translation or English composition, each, once a fortnight. The Senior class write frequently on topics connected with their course of study. There is a Rhetorical exercise in the Chapel every week before all the members of the College, in which every student will share in his turn.

VI. Practical Theology and Religious Observances.

JUNIOR YEAR.

3rd Term, { Paley's Natural Theology.
{ Paley's Evidences of Christianity.

SENIOR YEAR.

3rd Term, Butler's Analogy.

There is a general Bible exercise on the afternoon of every Sabbath. On the morning and evening of the Sabbath the students attend religious worship in the usual form with the Faculty in the Chapel, unless permission has been given to worship with some other society; and morning and evening prayers are attended through the week. A familiar acquaintance with the Scriptures, and a thorough knowledge of the Christian system, together with the cultivation of the moral affections, are deemed an important part of a liberal education; and efforts are made to secure both a speculative and practical acquaintance with the religion of the Bible.

There will be an examination of all the College classes at the close of the first and second terms, on the studies of those terms.

The Freshman, Sophomore and Senior classes will be examined at the close of the third term, on all the studies of the previous year; and the Junior class on all the studies of the previous course.

Beside the lectures mentioned in the preceding outline, a lecture will be delivered every fortnight, before all the students, on some subject pertaining to practical ethics, literature or science, designed to promote good order, decorum, and enthusiasm in the proper business of students.

The present course of study is the result of careful investigation and actual experiment. It is designed to be as full as the student can sustain, in four years, with good talents and close application. It will not suffer when compared with the course in most other Colleges. At the same time, a sufficient number of instructors, and a sufficient amount of apparatus and means of illustration, have been provided to give it effect. It has been a first object, not so much to increase the number of students and enjoy a temporary popularity, as to be fully competent to instruct and lay the foundation of a lasting reputation. The aim has been to provide every thing essential to a College of a high character; and in this respect this College has accomplished, in a few years, what has only been effected in other Institutions in a much longer period. The Faculty is now full, and the Institution is put in a state of readiness to do the work for which it was established. There can be no doubt that a College brought thus suddenly to a degree of maturity, was needed. And it is believed that the public will avail themselves of the benefits of it, and that it will be sustained. But the day for exertion and self-denial is not past. A large increase of students is needed, that the labors of instructors may be most available, and that the profits of their tuition may meet the current expenses. The amount of the charge for tuition the past year did not exceed $2,500. The Institution is pledged to pay for instruction the present year, $7000. And though Professorships have been endowed with the view to supply the deficiency, yet in their present state they are available but in part, and charitable aid to the amount of two or three thousand dollars will be needed, the present year, to sustain the Institution. Will its friends compel it to retrace its onward movement, when when so near the realization of their fond anticipation?

Fund for the Indigent.

The Trustees have commenced raising a charity Fund for the relief of indigent students. Hereafter the Faculty are authorized to remit the tuition of pious young men devoted to the work of the

ministry and possessing industrious and economical habits. The College seeks the influence of such young men within its walls, the churches need their labors as soon as they can be fitted for their work, and their education fulfils the design for which the Institution was founded.

Terms of Admission.

Candidates for admission to the Freshman Class are examined in English Grammar, Geography, Arithmetic, Andrews and Stoddard's Latin Grammar, Andrews' Latin Exercises, Cicero's Select Orations, Sallust, Virgil, Goodrich's Greek Grammar, the Four Gospels and Jacob's Greek Reader. For Jacob's Greek Reader, Græca Minora, or Xenophon's Anabasis will be received as a substitute. Some previous acquaintance with Algebra and Geometry will greatly facilitate the student's progress, but it is not indispensable.

A candidate for an advanced standing, in addition to the above studies, is examined in the various branches to which the class which he proposes to enter has attended.

The stated times for the examination of candidates for admission are the Monday preceding Commencement, and the last day of the vacation immediately following.

No one can be admitted to the Freshman Class till he has completed his fourteenth year, nor to an advanced standing, without a proportionate increase of age.

Satisfactory testimonials of good moral character are required, and those who are admitted from other Colleges must produce certificates of dismission in good standing.

Having passed a satisfactory examination and paid the tuition for one term, students are admitted on probation, and receive from the President a copy of the laws of College, and a certificate of admission. After a residence of one term, those who have sustained an unblemished moral character, and have given to the Treasurer a satisfactory bond for the payment of term bills, are admitted to matriculation, and become regular members of College.

An accurate and thorough acquaintance with the studies required for admission is indispensably necessary, in order to receive the full advantage of the College course. It is found from experience, that students imperfectly prepared for the classes they enter, are embarrassed in their future progress, and are seldom able to repair the want of solid preparatory instruction.

Expenses.

Tuition, - - - - - -	$30 00
Room rent, - - - - -	6 00
Contingences, - - - - -	3 50
Use of Library, - - - - -	1 50
Amount of charges by the College,	$41 00

Of things not furnished by the College, the cost of board is the greatest. Board may be had in good families for $1,25 a week, or $50 a year, not including vacations. Those who associate and furnish provisions and hire their food prepared, find that it costs 75 cents a week, or $30 a year.

Wood may be had for $1,25 a cord. Students provide for themselves bed and bedding, furniture for their rooms, lights, washing, books and stationery, and a small bill for each is incurred.

It is estimated that the whole annual expense of the student need not exceed $150 or $200 a year.

Pious young men preparing for the ministry can be aided by the American Education Society to the amount of $80 a year.

Terms and Vacations.

"There shall be three College terms in each year:—the first shall consist of fourteen weeks, beginning six weeks from Commencement, or from the second Wednesday in August, and be followed by a vacation of two weeks:—the second shall consist of fourteen weeks, followed by a vacation of four weeks; and the third term shall continue till Commencement." College Record, page 126.

The terms and vacations for the current year are

From Sept. 22, a Term of 14 weeks,
" Dec. 29, a Vacation of 2 weeks,
" Jan. 12, a Term of 14 weeks,
" April 20, a Vacation of 4 weeks,
" May 18, a Term of 12 weeks.

The year closes with Commencement, August 10, 1842.

It is highly important that the students should return to College in time to attend the first recitations or lectures of their respective classes, since an absence of a few days at the time when a new branch of study is commenced, seldom fails to embarrass the whole course, and in some cases it is impossible to make up the loss.

PREPARATORY DEPARTMENT.

This Department had its origin with the College, in the necessity of first fitting young men for the Collegiate course of study before regular classes could be organized. And though at first it was regarded only as a temporary expedient, experience has shown the importance of its permanence. To the public it may be a permanent benefit; and the College needs it to give the English education requisite to entering upon the Collegiate course, to secure the full amount of classical study required to enter, and to exert an influence on preparatory instruction and attainment abroad, and provide for itself an adequate number of well qualified students.

It has therefore been decided to make this Department a permanent branch of the Institution; to provide for it ample instruction; to increase its accommodations; to enlarge its course of classical study, and connect with it an English course; and to make it in all respects equal to the best Academies or High Schools.

Till an adequate building with a distinct location can be provided, one of the College edifices is assigned to this Department, affording ample accommodations for a large number of students.

Two courses of study are adopted, the one Classical, designed to fit young men for College; the other English, designed to fit young men for business, for teachers, and for entering upon professional studies. The studies of the two courses may be seen from the following list of text books.

Common to both Courses.

Worcester's Modern Geography;
Davies' Arithmetic;
Davies' First Lessons in Algebra;
Smith's English Grammar;

Porter's Rhetorical Reader;
Webster's History of the United States;
Worcester's Elements of History;

Peculiar to the English Course.

Davies' Geometry and Trigonometry;
Davies' Surveying;
Olmsted's Natural Philosophy, 12mo.;
Olmsted's Astronomy, 12mo.;

Greek Testament;
Anthon's Cicero's Orations.

In addition to the regular Teachers in this Department, students of the more advanced classes have the benefit of the instructiou and supervision of Mr. Seymour, the College Professor of Languages, and of the Lectures of Prof. Loomis in Natural Philosophy, and of Prof. St. John in Chemistry, Mineralogy and Geology, with the superior Apparatus and Cabinet belonging to the College.

Besides the Lectures above referred to, students, both in the Classical and English course, will attend a public Lecture from some of the College Faculty on some subject connected with practical education once in two weeks.

Regular hours of study and recitation are observed; morning and evening prayers in the Chapel and worship on the Sabbath are attended; and an exercise in the Scriptures is required once a week.

By the payment of fifty cents per term, access may be had to the College Library.

The advantages of the above arrangement, some of which can hardly be found elsewhere, are—

1. The establishment of regular habits of study, and intellectual and moral discipline, under able instruction and supervision.

2. To the student in the English course, a more finished education than is ordinarily obtained except by College graduates, fitting young men for business, to become professional teachers, or to enter upon the study of law or medicine.

3. To the student in the classical course, an English education adequate to his wants in College and in future life, a correct introduction to the Classics, and a thorough preparation to enter the Freshman class in Western Reserve College, or any other College in the country.

Terms of Admission.—Those admitted to this Department must sustain a goood moral character, have attained to twelve years of age, and enjoyed the advantages common in the best common schools. No one will be permitted to receive a room or attend recitations till he has paid in advance to the Treasurer of the College the amount of one term bill. Tuition must continue to be paid in advance, or satisfactory security given. Students may enter any class they are prepared to join. They can be admitted at any time, though the best time for entrance is the beginning of a term. No one can be received for a shorter period than a term, and in leaving before the close of any subsequent term, no abatement from charges will be made for any period less than half a term. The ordinary period for completing either the English or Classical course is three years.

Expenses.—The charge for tuition is $20 per annum; and for room rent $3. Other expenses will vary according to circumstances and the habits of the student. There is necessarily a small expense for contingencies, books, furniture, wood, lights, &c. The text books can be obtained in Hudson at a small advance on their cost in

Eastern Bookstores. Students will do well to bring from home their bed and bedding, and, if convenient, furniture for a room. The charge for board is the same as to Collegiate students.

Manual Labor, either on the College lands or in the employment of those connected with the College, can be had to occupy the student's vacant hours, afford him healthful exereise, and give him a valuable profit. Regular, industrious young men may earn 8 cents an hour, and $1 a week, and $40 a year. Labor, however, is voluntary, and few have perseverance to reach the highest amount.
